

APPLICATION ENGINEERS

You are a dedicated, service minded and skilled application engineer, with a solution oriented approach to technical problems. As a member of Nordic Semiconductor's technical support team, you will work with the leading vendors of wireless consumer electronics. Your work day will be filled with solving various challenges that will help make our customer's products better.

You will be involved in a variety of support cases related to Nordic Semiconductor's RF products, in particular RF hardware, *Bluetooth*[®] low energy, USB and ANT.

Qualifications

- M.Sc. in Computer Science, Electronic Engineering or Engineering/Bachelor degree. We encourage graduates to apply.
- Experience in some, or all, of these areas:
 - RF protocols
 - USB applications
 - Microcontroller application development
 - RF system measurements
 - Technical support
 - Programming in C
 - Bluetooth systems
 - Customer handling
 - Technical article writing
- Good English communication skills, both written and spoken

Benefits

- Flexible working hours
- 5 weeks paid vacation
- Insurance and pension plan
- Bonus plan
- Relocation costs covered
- An informal and challenging working environment

Location: Trondheim, Norway – see www.trondheim.com/englsk
