

Nordic Semiconductor POPs Statement

Document ID: HSM_024 Rev. 1.0

Persistent organic pollutants (POPs) are organic substances that persist in the environment, accumulate in living organisms, and pose a risk to our health and the environment. They can be transported by air, water, or migratory species across international borders, reaching regions where they have never been produced or used. International risk management is necessary as no region can manage the risks posed by these substances alone.

Scope

This declaration is applicable to integrated circuits and modules supplied by Nordic Semiconductor.

POPs Declaration

Nordic Semiconductor hereby declares that delivered products and product packaging, based on the Company's knowledge and suppliers' information, comply with **EU Persistent Organic Pollutant (EU POP) regulation (EU) 2019/1021**. This declaration reflects the latest update to the list of substances subject to POPs regulation, as published by the European Chemicals Agency (ECHA) on October 31, 2024.

List of substances subject to EU POPs regulation: <https://echa.europa.eu/list-of-substances-subject-to-pops-regulation>

Nordic Semiconductor has taken reasonable actions and will continue its efforts to provide representative and accurate information concerning the EU POP regulation on its products. Nordic Semiconductor relies on information from third parties, including suppliers. Nordic Semiconductor's standard warranty and standard terms and conditions apply to the representations herein unless otherwise provided by a written contract or other agreement signed by the parties.
