

SECURE, RESILIENT, FUTURE-PROOF GLOBAL IoT CONNECTIVITY

△ R K E S S △

Part of the Wireless Logic Group

Why Arkessa?

- Over 12 years' experience helping customers deploy industrial IoT applications.
- Commercial and technical flexibility to support any business model.
- Over 8 million devices connected globally.

Why Nordic Semiconductor?

- Over 30 years experience in integrated electronics design, services and products.
- nRF91 Series of low-power cellular devices engineered to perform the highest standards of energy efficiency and security through a single chip.
- Making cellular IoT easy. Clear market leader in Bluetooth Low Energy championing ease of use for developers together with Arkessa, simplifying cellular for embedded customers.

What do we offer?

Nordic Semiconductor customers who are deploying applications using their low power nRF9160 module a complete global managed IoT connectivity solution through a single partner. One provider, one platform, one contract.

Smart Spaces

Pet Tracking

Predictive Maintenance

Agriculture

Metering

Lighting

Smart Cities

Healthcare

SCALABLE

- Global roaming solutions
- Access to 148 low power networks in over 45 countries
- 24/7 multi-lingual support
- Low cost, global LPWA solutions
- World-class connectivity management platform

SECURE

- Secure network with access to private static IP addresses
- VPN connection to private/public cloud
- Private Access Point Name (APN)
- Security-as-a-Service (optional)

FUTURE-PROOF

- eSIM ready
- 4G coverage
- 5G ready
- NB-IoT and LTE-M

Partnerships with MNOs globally

Multiple SIM factors

Connectivity Management Platform
