### REMARKS AND COMMENTS:

It is mandatory to inform DEKRA Testing and Certification, S.A.U. in writing about any change in the approved equipment identified in this certificate, which could affect the conformity of the apparatus with the essential requirements or the conditions of validity of this certificate.

EMF exposure only evaluated when the antenna used with the device is located at a minimum distance of 20 cm from the user.

Device tested with a reference antennas as detailed below:

- LTE: P822601 / P822602
- GNSS: DSPG.1575.18.4.A.02
- Bluetooth Low Energy: 2450AT18D0100

Antenna should be installed following manufacturer instructions. The use of different antennas may affect the compliance; if the manufacturer is in doubt about the compliance then the equipment with the new antennas must be assessed to demonstrate compliance with the essential requirements of the 2014/53/EC Directive. It should be noted that assessment does not necessarily lead to testing.

This certificate replaces the certificate version 59675RNB.002.
